

# STONY PLAIN SUN.

VOLUME FOURTEEN

STONY PLAIN, ALBERTA, THURSDAY, JAN. 4 1934

Whole No. 698

## SWEARING-OFF SEASON.

The New Year now's oncoming,  
And I am thinking hard  
Of sins which need entombing—  
What sins shall I discard?  
Each year I have been pledging  
Myself to better things,  
And while my friends were hedging  
I kept my vows, by Jings!  
Long since I used to borrow  
A rouble here and there;  
Which habit brought me sorrow  
And forty kinds of care.  
All blushing I admit it  
But I had sense enough  
One New Year's Day to quit it—  
And quitting is hot stuff.  
I used to call for flaggons  
And pannikins of beer,  
And kept the brewers' waggons  
In action through the year.  
Rejecting every warning  
I pulled this foolish chore;  
Until, one New Year morning,  
I vowed I'd drink no more.  
And so, one New Year morning  
I cried aloud: "By James!  
Hereafter I'll be scorning  
The drinker's foolish games!  
I will not sit consuming  
The chilly beer all day,  
But when my thirst's abooming  
I'll eat a plate of hay!"

## ROYAL CAFE, STONY PLAIN.

Moose Hall, Stony Plain.  
EDMONTON ORCHESTRA.  
CARD-PLAYING and DANCING.

## "And Goodwill Prevailed."

A Conference of the U.F.A. members of the Legislature was held in Edmonton last week. Among the questions discussed were those of rural phone lines and maintenance of highways. Outside members, it is said, in the course of the discussions, made reports on existing conditions as they have found them in their respective constituencies, and this information, it is understood, will be used by the Government in preparing its legislation for the coming session of the House.

## Petzgold Sentenced to 1 Year

In Edmonton police court, on Saturday last, Officer Bone was successful in securing the conviction of John Petzgold, said to be of the Stony Plain district, on charges of forgery, false pretences and theft. Accused pleaded guilty to theft of a car at Stony Plain, forgery of two checks in Calgary, and false pretences. Forgery and theft convictions drew a year each; the false pretences counts 6 months each—all to run concurrently. Petzgold had taken the car to Calgary and sold it.

## Beware the Swindler!

A firm of jewelers in Edmonton have reported that a man giving his name as Sherret or Charette, and purporting to represent this firm, has been victimising residents of towns and villages throughout the province, taking deposits on orders for an ivory clock and picture frame combination and giving a receipt for their firm. Several people at Saint Paul de Metis, it is reported, have been swindled by this man. The swindler is described as about 6 feet tall, nearly bald, has blue eyes, and is of rather shabby appearance.

## Auto License Changes.

The Provincial Government will not accede to the request of the A.M.A. that the motor license year be altered from Jan. 1 to April 1. There will be certain concessions by the Government designed to meet the problem of the Association to some extent. For those taking out licenses April 1 there will be a reduction of 20 p.c., and a 40 p.c. reduction goes into effect July 1. This puts the licenses very much on the same basis as in 1933, except that notice of the reductions is being given well in advance.

This is the open season for obtaining your license plate for the car. If you're getting it in Edmonton, it will be in one of these classes, depending on when you apply: Nos. 1 to 5000; 31,000 to 32,000; and 71,000 to 72,000. These are the numbers usually reserved for distribution in Edmonton. Up to Saturday a large number of motorists had applied for special numbers.

# Flour Mills Of Canada Attain Capacity Far Beyond Needs Of Domestic Market

Canada has 1,265 flour mills with a daily capacity of 112,048 barrels. The flour-milling industry in Canada goes back to 1605 when the French settled Port Royal, now Annapolis, N.S. In that year the first wheat raised in America was grown there. And in the same year the first water wheel was erected to provide power for a mill.

Of the milling business today, the current Canadian Pacific Railway agricultural bulletin says: "The flour mills of Canada have attained a capacity far beyond the requirements of their domestic markets. The population of the home market, numbering approximately ten and one-half million, requires only about 41,750,000 bushels of wheat."

"The quality of the hard spring wheat flour is widely known and the flour manufactured from soft winter wheat grown in Ontario has considerable reputation in British markets. The distribution of the commercially important milling capacity may be shown by provinces as follows:

"Prince Edward Island, 18 mills with a capacity of 706 barrels per day.

"Nova Scotia, 16 with 168.  
"New Brunswick, 30 with 526.  
"Quebec, 352 with 13,614.  
"Ontario, 670 with 55,427.  
"Manitoba, 38 with 12,090.  
"Saskatchewan, 60 with 13,967.  
"Alberta, 75 with 14,166.  
"British Columbia, 9 with 1,394.

"Canada has 1,265 mills with a capacity of 112,048 barrels per day.

The more important milling centres, with capacities in barrels per day, are as follows: Montreal, 21,000; Keweenaw-Kanora, 14,800; Port Osborne, 14,000; Winnipeg-St. Boniface, 8,000; Medicine Hat, 6,000; Peterborough, 5,500; Calgary, 5,200; Saskatoon, 4,200; Moose Jaw, 4,000; Toronto, 3,125; Fort William, 3,000; Goderich, 2,600; Portage la Prairie, 1,500; Brandon, 1,200; Melville, 1,000; Vancouver, 1,100; London, 1,050; Brandon, 950; Factoria, Sask., 850; Chatham, Ont., 800; St. Marys, Ont., 700; Seaford, Ont., 700; Stratford, Ont., 700; Edmonton, 640; Lethbridge, 600; New Hamburg, Ont., 500; Souris, Man., 500; Renfrew, 400; Woodstock, Ont., 350; Preston, Ont., 325; Tavara, Ont., 325.

And one great problem is to find and maintain markets for the flour.

## First Farmers Of Canada

### Indian Method Of Cultivating Land Was Very Primitive

Long before the coming of the white man, agricultural people, organized into more or less settled communities, occupied the fertile outlands of Ontario between the Great Lakes and its continuation along the St. Lawrence Valley, north of the Laurentian Shield. The Iroquoian tribes, who had learned in the south how to grow maize, beans, squashes and turnovers, introduced their cultivation into south-eastern Ontario and the St. Lawrence Valley, whence they spread into New Brunswick.

But the Indian methods of cultivation, says Diamond Jenness, in "Indians in Canada," were exceedingly primitive. Their stone axes barely hit into hard maple or birch trees that were not first charred with fire so that they depended mainly on burning for the clearing of their land. Long digging sticks or hoes fitted with bands of shells supplied the place of ploughs; the ripened ears of corn were gathered by hand and transported in baskets by the women to the husking shed. No tribe understood the rotation of crops, or indeed possessed the means to rotate them, but few made any attempt to fertilize the soil. Consequently, when their plots became exhausted within ten or twelve years, the community moved away to new but unbroken ground. The exhaustion of the soil supply in the near vicinity was also a common cause for abandonment of otherwise favorable sites.

## Insects Take Big Toll

### Damage To Plants And Trees Runs Into Billions

The annual loss caused in the United States by insects is estimated by the Department of Agriculture to reach a total of \$2,000,000,000. Without insecticides, according to Dr. Henry G. Knight, chief of the Bureau of Chemistry and Soils, it would be impossible to feed the world as society is organized today. Only by concerted war on predatory insects which dispute possession of the earth with man can society be protected against famine and pestilence. The damage to growing plants caused by insects every year in this country is estimated to average 10 per cent. of their value. Knight places the loss to forest trees alone at \$100,000,000 annually.—Washington Post.

By Ruth Rogers

### AN ADORABLE SCHOOL OR COLLEGE DRESS IN MARIETTE'S HAIR WOOLLEN

Simple woollen frocks for general daytime occasions and for school and college wear, are tremendously important this season.

The hairy woollen mixtures seem to lead the smart parade.

Wool jersey, tweeds, wool and synthetic mixtures and worsted crepes are also exceedingly fashionable.

Owing to its studied cut, this frock is good for heavier figures besides slim youthful types.

Style No. 514 is designed for sizes 12, 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 3 yards 54-inch with 1/4 yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

A new Lacoste By trap is to be widely used in the Blue and Congo.

## Effective At That

### U.S. Paper Has Ideas About Canada's Criminal Law

Canadians seem to have an old-fashioned notion that law is law and should be enforced. In the United States we are more up-to-date.

For example, a dope peddler was tried in Montreal recently, and this was his sentence:

(A) Fourteen years in prison.

(B) Fines amounting to \$300.

(C) Ten lashes on his bare back.

You doubt if that gentleman would care to sell dope again in Canada, even if he had not been given a single day in prison or a single cent of fine.

The whipping alone would probably convince him that he should seek fresh fields and pastures new.

We don't know that whipping is the best penalty, or that we should adopt it. But we do know that something of the Canadian attitude toward law enforcement would discourage a lot of criminals here.

When you can't "see the judge," or when your lawyer can't delay a trial for a year or two and then appeal it for another year or two, or when you run imminent risk of contact with the "cat o' nine tails," you have a powerful inducement to be good.

But, as stated, those ideas are too old-fashioned for this up-to-date country.—Washington, D.C., Times.

## Flies Over Frozen Wastes

### Attains Point 350 Miles South Of Captain Cook's Record

Rear Admiral Richard E. Byrd drove another great aerial wedge of exploration into the uncharted spaces of the Antarctic continent.

Halting the southerly progress of his flagship along the 150th meridian when the ice pack threatened to block all passage, he ordered the ship into open water, put his great seaplane over the side and bored into the south.

Before he turned back, the flight carried him to a latitude of 70 degrees, surpassing by 350 miles the record southward point attained by Captain Cook on his meridian in 1773.

Talked Himself Out Of Job

Frank Reed, of Cincinnati, Ohio, just talked himself out of a job. It was he who persuaded the county commissioner to conduct a civil service examination in filling the job of purchasing agent when his own term of office expired. He took the examination along with the rest and failed to pass.

## Purely Domestic

The Christian Monitor says if the plan is carried to its logical conclusion, the United States Army, which has eliminated from its mount olive, bananas, cane sugar, and other articles of food, solely because they are imported, will also confine its military activities to home shores.

# Squadron Of British Flyers Will Make Long Flight To Show Flag In Remote Lands

## Classy Folk Songs

### Western College Of Agriculture Has Good Selection

When Dean E. A. Howes, of the College of Agriculture, University of Alberta, looked around for folksongs, he stepped into a deluge.

Now the dean has 5,000 of them in his collection. But there is one that the modern girl has completely debunked. It's the harrowing tale of "Young Charlotte," a billie of a bygone day when petticoats were numerous.

Once thrilled by the song of Charlotte, freed to death on a 20-mile ride in a sleigh with her boy friend, George, to a dance, the dean no longer believes it happened.

The song says they spoke only a couple of times and when George went to help her out of the cutter, "he took her hand in his—it was cold and hard as stone." She was dead, and George's evening was spoiled.

Debunking of the song came through modern girls dashing around in only a fraction of the clothes Charlotte wore in weather just as severe without suffering any ill effects.

There are a score of other songs of similar strain in the collection. One tells of the Lord Lovell's bride disappearing at a Christmas eve party when she was "it" in a game of hide and seek. She hid in a chest and "it" closed with a spring and her brisley bloom lay withering there in a lonely tomb. They found her skeleton months years later.

## Adoption Of Idea Unlikely

### U.S. Journalist Would Save Space By Abbreviating English

A Los Angeles journalist offers through the agency of the American Society of Newspaper Editors a suggestion terrifying in its implications.

He has discovered that the word "the," being the most used in the English language, puts an economic burden on the press which is hard to bear. A savant in an Iowa university found after exhaustive study that it appeared over 500,000 times in 5,000,000 words of newspaper print. Now if instead of "the," newspapers used only the symbol "t"—lower case—50 per cent. of the space used more than 550 per cent. of the typesetting required for the full word would be saved. Moreover, if the whole paper were considered, 1 per cent. of the white paper bill would be saved by the use of the symbol, while more than 1 per cent. additional news or editorial matter would find space in the normal-sized paper.—St. Thomas Times-Journal.

## THIS IS EASY—TRY IT SOMETIME

Bob of Carmel, shown above balancing a glass of water on his head, was one of the most interesting exhibits at the National Dog Show in London, England. Apart from expertness as a juggler, "Bob of Carmel" is a life saver. He has been awarded the animals "V.C." twice for saving his master's life. On the first occasion Bob pulled the boss from a blazing motor car, and in the second case saved his master from falling over a cliff by holding on to his coat tails.

Next year, for the first time, the annual Royal Air Force formation cruise from Cairo to South and East Africa and back will be entrusted to a "mixed" squadron: five single-engine Fairey and bombers and four Victoria troop-bombers are scheduled to leave Heliopolis aerodrome, near Cairo, about Feb. 29 and return there May 1 after a flight of some 12,000 miles.

Their provisional itinerary goes as far south as Pretoria, and takes them back to Cairo by way of Bayway, Livingstone, Salisbury, Abeterra, Mombasa, Nairobi, Malakal (Sudan), and Khartoum.

On the homeward flight, which will occupy the bulk of the time, the detachments will make halts of three or four days at each of the centres. Flights of two or three machines will be detailed during these periods to "show the flag" in outlying regions of Rhodesia and Nyasaland and to visit isolated military posts on the northern frontier of Kenya. The opportunity will probably be seized to engage in liaison exercises with ground forces and with the South African Air Force.

Fairey 3F biplanes have been employed for the past five or six years in large numbers with the Royal Air Force. Their purpose is to perform a variety of tasks in the course of routine duties are called upon to perform any and every kind of task. This type of aeroplane has been developed in Great Britain to a higher pitch than in any other country, simply because the responsibilities of the Royal Air Force, which is charged nowadays with the policing of approximately 1,000,000 square miles of the world's surface, demands such machines.

"Ambulance work, aerial survey, gunnery spotting, day bombing, offensive and defensive fighting—these are but a few of the duties of the British 'general purpose' aeroplane. Adaptability and absolute trustworthiness are essential; in the 3F craft, each of which is powered with a Napier 'Lion' 500 h.p. motor, these qualities are combined satisfactorily with speed and general flying efficiency.

The "Victoria" biplane has been the standard troop-carrier of the Royal Air Force for several years. Recently it has been re-designed. The result is notable increase of performance and the revival of a type of aircraft which three years ago was thought to be obsolete. The new "Victoria," like its predecessor, has accommodation for 22 fully-armed infantrymen in the cabin, but it can carry a much larger load than the older machine, has a longer practical cruising range, is faster and climbs more rapidly to a higher 'ceiling'.

A considerable number of the new model was ordered recently by the Air Ministry in the normal course of replacement of older machines. Two of the new machines reached Iraq at the beginning of this month. Five more recently arrived at Bagdad.

## Had Special Meaning

The custom of hanging overgreens in the house during the Yuletide originally had a purpose beyond that of decoration. In olden days each kind of evergreen was believed to confer special blessings on those who passed beneath its boughs. To pass under holly insured good fortune throughout the year, bay meant victory, while laurel was supposed to impart a spirit of beauty and poetry.—Missouri Farmer.

## Preferred Switzerland

The padre, who had not been feeling well, called in his friend the doctor. The latter vetted him thoroughly and then said: "Well, old chap, your lungs are not in good shape. You'll have to spend six months in Switzerland." "But I can't afford the time, my dear man." "Well, that's up to you, it's either Switzerland or heaven." The padre thought for a long time and then growled: "Oh, all right, Switzerland!"

WORLD HAPPENINGS  
BRIEFLY TOLD

There will be no banquets, balls or official receptions in the royal palace this winter because of the hard times in Holland, Queen Wilhelmina has decided.

Parliament will be summoned on Jan. 25, it was learned officially at Ottawa. It will be the fifth session of the 17th Parliament since Confederation.

Building permits issued in Sydney, N.S.W., in the first eight months of 1933 were more than double those for the corresponding period of the preceding year.

Although usually regarded as a tea-time treat, 50 drums of almond macaroons were included in the stores of the Byrd Antarctic Expedition because of their high caloric content.

The American museum of natural-history announced recently Col. and Mrs. Charles A. Lindbergh had presented to the museum the monoplane in which they completed a 29,000-mile aerial survey.

Dominion government approval of eight unemployment relief works in Manitoba, requiring a total expenditure of slightly more than \$23,000, was announced at Winnipeg by Mr. W. G. C. MacLeod, federal director of unemployment relief.

In response to the recent invitation of the British Home Secretary, Sir John Gilmour, 17,400 firearms, including 12,622 revolvers and pistols, 3,706 rifles and 73 antique firearms have been given to the government by individuals.

The Earl of Willingdon, viceroy of India and former governor-general of Canada has been granted four months' leave of absence from India and starting in May he will travel back to England with Lady Willingdon to spend the holiday at home.

Sales of liquor and beer in British Columbia during the fiscal year ending March 31, 1933, decreased approximately 27 per cent. according to figures released. Sales totalled \$8,607,316, lower by \$3,146,625 than those of the previous year. Profit to the provincial government last year was \$2,224,873.

## Where Radio Falls

## Common Thing For Program To Break Off In Middle

A newspaper which ended a story in the middle of a sentence or the middle of a word would hear all about it from readers; yet that is a common thing on the radio. Two recent incidents have aroused considerable comment. During the broadcast of the funeral services for Arthur Currie, station CHCT, Toronto, owned by the Canadian Radio Commission broke off in the middle to broadcast a commercial programme. Similarly the speech of Premier Bennett was cut off to be replaced by Paul White-man's Jazz band. One listener says he dialed CKLW, Windsor, and heard the remainder of the speech, but it was interspersed with a selling talk for an American cigarette. And yet there are some folk who suggest that the radio may displace the newspapers—Nagars Falls Review.

## A Miniature Zoo

## Animals Sent From Toronto To Park In Edinburgh

Miniature zoo arrived in Glasgow from Montreal. The specimens were: Four young American black bears, four Canadian beavers, two porcupines, and six turtles. They were consigned from the Toronto Zoo to the Scottish Zoological Park, Corstorphine, Edinburgh. The beavers were sent as a gift of Captain Stewart, of the Department of Colonization for the Province of Ontario in Glasgow.

## Had Ample Proof

"The last speaker," said the chairman of the Health Congress "is a striking example of the efficacy of the doctrine he so eloquently advocates. Hale and hearty at 80 years of age, he could tire out many a man younger than himself."

A voice from the audience—"He did."

W. N. U. 2297

By Ruth Rogers

FASHION IS EASY ON THE YOUNG  
HERE'S A CHARMING SIMPLE  
TO CREATE DRESS—NEED  
NOT BE COSTLY

Many a new dress plays tricks with its shoulders, and you'll agree, that today's model is adorably smart. Here's an opportunity to have a Chinese red crepe silk dress for your holiday engagements.

A cute bow finishes this neck, and the pearl belt, narrows the waistline. It slips through a huge gold metal buckle at the back. Peacock blue, copper and emerald green are other bright shades in crepe silk for this model, and incidentally they are all very modish.

Style No. 359 is designed in sizes 11, 13, 15 and 17 years.

Velvet is also lovely.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## New Post Office For Arctic

To Be Served By Air Mail Twice Every Year

Opening of a new post office, at Coppermine, N.W.T., on the Arctic shore, was announced by the post office department.

This office will be served by air mail from Cameron Bay, N.W.T., twice each year, in January and July. Postage rates for this service are: First class, second class and third class matter by ordinary first-class rates; second class matter; from offices of publications and news dealers, four cents a pound; parcel post, \$1.50 a pound.

## Shortage Of Schools

For the 1,000 state teachers who qualified recently at Lisbon, Portugal, there are no schools. They have caps, gowns, cases, copy books and everything necessary for their professions, but they have nobody to teach. Although education is compulsory in Portugal, thousands of children are going without instruction because of lack of school buildings.

## SUNDAY SCHOOL LESSON

JANUARY 7

## BIRTH AND INFANCY OF JESUS

Golden Text: "Thou shalt call His name Jesus; for it is He that shall save His people from their sins."—Matthew 1:21.

Lesson: Matthew 1:1-2:23. Devotional Reading: Isaiah 9:2-7.

## Explanations and Comments

The Visit Of The Wise Men, 2:1-12.—It was in the days of Herod the Great, whose reign in Judea lasted from 37 to 4 B.C., that Jesus was born in Bethlehem. The Wise Men or Magi, who came from the East to seek Him, belonged to the priestly or learned class famous among the Greeks, Persians, and Babylonians as astronomers, astrologers, physicians, soothsayers, and interpreters of dreams. The tradition that there were three Wise Men (named Casper, Melchior and Balthazar), may have had its origin in the fact that their gifts were of three kinds, verse 11. They had seen in the East a remarkable star, the star of Him who was born King of the Jews, they declared, and they had come to worship Him. "The science of the Magi had little to do with the modern astronomy, but it led to the cradle of the Lord, Kepler, who followed after many centuries, was led by a nobler science of the stars to a higher adoration."

"Whatever Wise Men they were before, now they begin to be wise men indeed when they set themselves to inquire after Christ," is Matthew Henry's comment.

"Star of the East! Show us the way In wisdom undefiled

To seek that manger and lay To gifts before the child—

To bring our hearts and offer them Unto our King In Bethlehem."

—Eugene Field.

## Will Not Produce Energy

Power Not Likely From Atom Splitting Says Lord Rutherford

Fondly-held beliefs that a revolutionary source of energy for all mankind's needs will be found in the split atom have been tossed gently into the scientific refuse heap by Lord Rutherford.

"The energy produced by the breaking down of the atom is a very poor kind of thing," said the Cambridge University physicist, who has repeatedly successfully shattered atoms. "Anyone who expects a source of power from the transformation of these atoms is talking moonshine."

The atom, he said, has been split into 50 constituents by bombarding it with gases containing an electrical density of five million volts. During this bombardment, the same times appeared a definite grain of energy. "But," he added, "such enormous numbers of particles have to be fired that the energy expended is much greater than that given out. A million or a hundred million particles might have to be fired to hit one atom."

"The experiments are not made with any practical end in view, but to add to our knowledge."

"We hope that within the next few years we shall get some idea of what these atoms are, how they are made, and the way they are worked."

## Treatment For Pneumonia

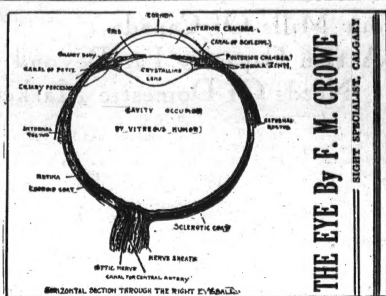

Air Injected Through Chest Wall In Acute Cases

Dr. Alfred Stengel, professor of medicine and vice-president of the University of Pennsylvania in charge of medical affairs, confirmed a report that artificial pneumothorax recently was used in the treatment of acute lobar pneumonia at the university hospital, for the first time in the United States.

The treatment is similar to that used for many years in cases of pulmonary tuberculosis and consists of injecting air through the chest wall of a patient to compress a diseased lung.

## Might Have Changed Things

Lloyd George tides in his war memoirs that the British Expeditionary Force did not land at Antwerp because advised by the British War Office that the Germans couldn't move rapidly through the Belgian mud. Would the course of the war have been changed, and to what extent, had the war office known what it was talking about? asks the Lethbridge Herald.

THE EYE BY F. M. CROWE  
—SIGHT, REFRACTION, CURE—

Marvels of the Human Eye  
By F. M. CROWE, Optometrist-Optician, Calgary

## NO. 3.—SOME OF THE PARTS AND THEIR USES.

The Vitreous Humor is the transparent fluid filling about the four-fifths posterior cavity of the globe which is thus enabled to retain its shape. It resembles the white of an egg and is surrounded by a thin membrane lying close to the Retina. The Lens hangs vertically in a depression its convex form makes for itself in the front part of the Vitreous.

The length of the standard eyeball from front to back is approximately one inch and the side to side dimensions a true more. Since there are no converging rays of light in nature how are the rays from any object brought to a focus in the short space of one inch when must be the case if we are to distinguish it? This is accomplished by the two very convex bodies described namely, the Cornea and the Lens. But for close work the Lens automatically becomes still more convex or "accommodates" for the distance we desire to see. At the age of twelve the accommodation is so active that a child can read just as easily three inches from the eyes as at arms length, but with increasing years the accommodation diminishes and in the average person of forty, focusing for the usual reading

distance of about fourteen inches has become such an effort and strain that the print blurs or runs together and if continued brings on headaches, nervousness, irritability and other unpleasant symptoms due to using up so much nervous energy for this purpose, hence the only solution for this condition is properly fitted glasses, and as the accommodation continues to decrease till about the age of sixty, so the strength of the reading glasses has to be changed periodically, although the vision on distant objects may remain as good as it ever was.

Besides the muscles inside the eyeball there are six pairs attached to the outside and via nerves supply power for their functioning. Just how this functioning, when normal, is or otherwise, takes place will be the subject of another article.

What a marvelous organ is the eye and what an amount of work it has to perform when normal, but when abnormal, through being too long, too short, imperfectly curved Cornea, unbalanced muscles or from other causes—we must expect poor and uncomfortable vision and very often more serious disturbances affecting our health.

(To Be Continued.)

## Recipes For This Week

(By Betty Barclay)

## LEMON JUNKET WITH BAKED APPLES

1 tablet for junket.

1 tablespoon cold water.

1 pint milk.

3 tablespoons sugar.

4 apples.

Marachino cherries.

1 teaspoon lemon flavoring.

1 cup sugar.

1/2 cup water.

1/2 teaspoon red food color.

Cinnamon, if desired.

Make a syrup of 1 cup sugar, 1/2 cup water, cinnamon, and red food color by boiling 5 minutes. Put the apples, which have been peeled and cored in a pan and pour the syrup over them. Bake until tender, basting frequently. Place in individual dishes lining center of each apple with syrup. When cooled and syrup has jelled, chill in refrigerator. Dissolve tablet for junket in 1 tablespoon cold water. Add 3 tablespoons sugar and lemon flavoring to milk, and warm to lukewarm—not hot. Add dissolved tablet for junket, stir a few seconds, and pour over apples. Let stand until firm, then chill in refrigerator. Place cherry on top of apple when ready to serve.

## CRANBERRY MOLD

1 package lemon-flavored gelatin.

1 1/2 cups boiling water.

Juice 1/2 lemon.

1/2 cup celery, finely cut.

1/2 cup canned shredded pineapple.

1 cup thick cranberry sauce.

Dissolve gelatin in boiling water. Chill. When slightly thickened, add lemon juice, celery, pineapple, and cranberry sauce. Turn into mold. Chill until firm. Unmold. Garnish with mayonnaise. Serves 6.

## Advice To Skaters

Skate only when you are sure the ice is four inches thick; one inch thick, keep off; two inches, you may, alone; three inches, in small groups only, four inches, o.k. That's the rhyme and reason with which you can avoid having a going-to-glory skate over deep water.

## Defined University's Role

"Creator Of Sane Enlightened Thinking," Says Sir Arthur Currie

The role of the modern university "in the desperate battle of modern life" is not that of a "mere reservoir of knowledge, a storehouse of equipment, a base of supplies, but rather it must be the creator of forces for the moulding of human destinies by promotion of sane, enlightened thinking," says the late General Sir Arthur Currie, Principal and Vice-Chancellor of McGill University, in his last report to the Board of Governors.

Completed by Sir Arthur a few days before he was overtaken by illness, which resulted in his death on Nov. 30, the report was published after approval had been obtained from the Governor-General of Canada in the capacity as visitor to the university.

"Education merely as a decoration is dangerous," Sir Arthur continues. "Education for utilitarian purposes has some justification. But education that kindles the imagination, awakens the power of vision, teaches man to create, to evolve new ideas, to place fresh truths—this is the very loftiest aim of a university and the most splendid support it can perform for the State."

## League Stands Firm

Common Difficulties And Dangers Draw Remaining Nations Closer

The League still stands. No dog has been hauled down at Geneva, but the German and Japanese. Other members of the League have been drawn closer by common difficulties and common dangers. The United States and Soviet Russia are working harmoniously with them, and the direct discussions between these two great countries are of the best omen for the world. So far from recent events proving that the Geneva system is a failure, they have demonstrated the "unbreakable" that in the Geneva system alone is to be found. If not disarmament, then rearmament, and if rearmament, then war. And disarmament is possible on one condition alone, that the nations ready to disarm in accordance with their pledges stand inseparably together.—London Spectator.

## BRITAIN FACES THE NEW YEAR WITH CONFIDENCE

London, Eng.—Great Britain faces the New Year in the quiet confidence of notable achievement.

Scarcely more than two years ago she stood perilously near the edge of a financial abyss. Ready money was moving rapidly to foreign fields, British credit was falling. The "dollar" fund was running into debt to the tune of a million pounds a week. There were those, even, who predicted London had forever lost her pre-eminence in finance, that war and the aftermath of war had dealt such a blow that recovery was well-nigh impossible.

Since those tragic days Great Britain has quietly set the world an example which foreign nations are now breathlessly endeavouring to emulate. Always slow to act, she acted with startling thoroughness. With ruthless ease and tax she re-established her finances. Her bankrupt debt fund was now operating with a balance in hand. Favorable balances have already reduced by nearly three millions the fund's old debt of £115,000,000.

Included in the unemployment bill now before parliament is an amortization scheme to help the balance by fixed payments from the fund within a maximum of 40 years.

With extraordinary success she carried through the most extensive scheme of debt conversion known to financial history. She abandoned her traditional free-trade policy. She left gold; and the reaction, echoed round the seven seas. At Ottawa she concluded trade agreements with other nations of the British Commonwealth. With foreign countries, she made agreements in endeavor to break through the bounds of rigid economic nationalism. She has embarked on a five-year plan clear-cut plan. By schemes of marketing and control she is endeavoring to restore her agriculture to a paying basis.

Her credit is no longer shaky. Month by month her unemployment is falling. At the peak, insured unemployed totalled 2,851,000. They now stand at approximately 2,280,000.

The Board of Trade index figure shows that industrial production is back to 96.7 per cent. of what it was in 1924. In the quarterly period, July, September, 1932, it was down to 87.3.

### Car Radio Licenses

Only One License Needed On Home Radio And Car

Ottawa, Ont.—Next year's radio receiving licenses, which issue on April 1, in addition to authorizing the holder to operate a radio receiving set in his domicile will also permit him to operate a set in his personal automobile without additional fee. This announcement was made Wednesday night, Dec. 27, by Hon. Alfred Durneau, Minister of Marine.

This does not mean that automobile sets will be entirely free from the license restrictions. The concession now granted will apply only to automobile sets owned by a party already holding a license for a set in his home.

### Increase In Savings

Montreal, Que.—Canadians are saving their money. The annual financial statement of the Royal Bank of Canada for the fiscal year ended Nov. 30 shows an increase of more than \$18,000,000 in savings and demand deposits. Interest deposits total \$450,463,265 and deposits not bearing interest amount to \$128,820,094.

### Sympathy From Britain

London, Eng.—The British Government expressed its deep sympathy to President Lebrun, of France, on learning of the train disaster at Lugny in which 100 persons were killed. The communication was sent through the British ambassador at Paris.

Every policeman in Brighton, England, has been equipped with a pocket radio set.

W. N. U. 2027

## Employment Gain Sustained

Encouraging Statement Issued By Minister Of Trade And Commerce

Ottawa, Ont.—For the eighth consecutive month a gain was shown in employment on December 1, says a statement issued by Hon. H. H. Stevens, Minister of Trade and Commerce. The number of unemployed at the beginning of the month was 850,486 as compared with 845,793 on November 1, an increase of 4,693. Reflecting this improvement the index of the Dominion Bureau of Statistics, on the basis 1926 equals 100, rose from 91.3 on November 1 to 91.8 the highest figure in two years.

"During these last eight months of generally advancing activity, the 8,428 reporting firms have added approximately 147,500 persons to their staffs. The proportion of the wage-earning population included therein is large, but if data were available for all industries and all employees, the number of workers would considerably exceed that figure," Mr. Stevens says.

"The general index has risen from 76.0 at the beginning of April to 91.8 at the beginning of December, a gain of 15.8 points or nearly 21 per cent."

"The improvement at the beginning of December occurred largely in logging and retail trade and highway construction. Logging provided work for an extra 15,700 men, the 46,000 employed being the largest number shown in that industry in the bureau's record of 12 years," added Mr. Stevens.

### Averts Train Wreck

Prompt Action Of Section Man Avoids Possible Serious Accident

Calgary, Alberta.—Prompt action of an unnamed section man averted a wreck on the Canadian Pacific Railway near Wessex siding, five miles south of Carstairs, Alberta, during the week-end, it was revealed here.

Bound from Calgary to Edmonton with holiday passengers, a train was "flagged" by the section worker, who had discovered a broken rail. The rail, snapped by the severe frost, was discovered a short time before the train was due at Wessex. Emergency brakes brought the heavy train to a stop a short distance from the smashed rail.

### Railway Accidents

Fifteen Persons Killed And 217 Injured In October

Ottawa, Ont.—A total of 2112 railway accidents in which 19 persons were killed and 217 suffered injuries were reported to the Board of Railway Commissioners for October.

Of the total number 156 were railway accidents as distinguished from 28 accidents at highway crossings. Of these killed two were railway employees while 17 were classed as "others." No passengers were killed. The number of passengers injured was 18, while 149 employees and 50 "others" suffered injuries.

## ELEVATED

Sir Kingsley Wood, Postmaster-General in the British Government, who has been raised to cabinet rank. This will increase the cabinet as distinct from the full ministry of 21 members.

### Anticipates Better Times

S. J. Hungerford, Issues Optimistic Year-End Message

Montreal, Que.—S. J. Hungerford, acting president of the Canadian National Railways, recently issued the following year-end message.

"At the close of 1932 there are distinct signs that the bottom of the depression has been reached and that the years ahead will be years of recovery with a return to sane prosperity."

"I am distinctly hopeful that improved business conditions will produce substantial increases in traffic for the Canadian National Railways and I am confident that the system will show substantially increased net earnings."

"There is every reason for us to anticipate better things in the New Year."

### Starting Sugar Industry

Irish Free State Has Let Contract For Three Factories

Dublin, Ireland.—A further step in the campaign to make the Irish Free State economically self-sufficient has been taken by the letting of contracts totalling nearly \$10,000,000 for beet sugar factories.

Three new factories, at Malton, Thurles and Tullamore are to be erected in the effort to make the Free State independent of foreign sources of supply.

Contracts for chief items of equipment were placed with a German firm and one in Czechoslovakia. Pulp-drying plants to each factory will be supplied by the Buettner Werke, Uerdingle, Germany.

### Livestock Association Convention

Moose Jaw.—The Western Canadian Livestock Association will hold its annual convention in Moose Jaw on January 18 and 19. By letter it informed the city council it would accept the city's invitation to meet here.

## Duty On Sawdust

Must Pay Duty On Material In Which Grapes Are Packed

Ottawa, Ont.—Fruit importers will continue to pay duty on the sawdust in which grapes are packed, according to a judgment handed down by the tariff board.

In computing the value of the imported grapes for duty purposes, the National Revenue Department did so on the basis of weight.

Importers protested against this and it was pointed out to G. H. Sedgewick, chairman of the board, that in one instance a keg of imported grapes contained 20 pounds of fruit and 15 pounds of sawdust, the remainder being made up by the weight of the keg.

The importers protested against paying duty on the sawdust, but the board has ruled otherwise and the fruit importers' appeal is dismissed.

## Will Build Airport

Corporation Of London To Consider Erection Of Landing Stage For Planes

London, Eng.—The corporation of London has unanimously decided to consider the erection of an airport or landing-stage, F. A. Harmer, who brought the proposal forward, declared that in a year or two any city or town without a landing-stage or airport will be like a city or town without a railway station.

The nearest landing place to London at present is at Croydon, some 10 miles from the centre of the city. One suggestion is that a landing-stage could be erected over the Thames between Southwark and Blackfriars Bridges.

## Heavy Holiday Traffic

Railway Earnings Show A Substantial Increase

Montreal, Que.—"The heaviest Christmas holiday traffic in years" was the way railroad officials at head offices described passenger business.

Statements of traffic earnings, both passenger and freight, issued recently for the week ended December 22, tell the same story in statistical form. Compared with the same week last year, Canadian National Railways' earnings were up to \$2,817,254 from \$2,710,347, an increase of \$106,907. Canadian Pacific Railway earnings advanced to \$2,277,000 from \$2,242,000 an increase of \$35,000.

### Leaves For Egypt

Ottawa, Ont.—Hon. Arthur Sauve, postmaster-general, leaves this week for the congress at Cairo of the International Postal Union. He will be accompanied by E. J. Underwood and H. Beaulieu, chief officials of the post office department.

### Espionage Activities

Berlin, Germany.—Regarding the arrest of 10 persons in Paris, France, on charges of conducting espionage activities, the Prussian secret police said "it has been observing this situation some time and has been in touch with the French police."

## PREMIERS WILL MEET AT OTTAWA FOR CONFERENCE

Ottawa, Ont.—Unemployment insurance, relief and other questions in which the constitutional rights of the provinces must be considered, in the adoption of uniform legislation for the Dominion, will form the main themes for discussion at the Dominion provincial conference called to meet in Ottawa, Jan. 11.

It is believed likely that among the subjects to be discussed at that occasion, the united drive by the blind organizations of Canada to secure a stated schedule of pensions for the sightless poor will be prominent. The matter was urged before the Prime Minister by a strong delegation a few weeks ago, and the three prairie provinces have already signified their endorsement of such a move.

The subject of the Dominion's participation financially, in the celebrations planned for next summer in memory of Jacques Cartier's arrival in Canada, 400 years ago, and other historical landmarks, will also be discussed when the provincial government ministers gather in Ottawa.

On the subject of unemployment insurance, the administration is committed to a system in which the workers would contribute with the employers and governments and it is unlikely there would be any opponents to the move in the House of Commons. There is a feeling, however, that the present employment problem should be more nearly defined before any such scheme should be launched.

Nevertheless there is a great deal of preparatory work necessary before such a method of guarding against a repetition of the workers' problem, with which the governments have been faced in the past few years, be set in operation. For that reason it will doubtless be a subject for legislation at the forthcoming session.

It is known that much ground work has already been carried out and preparation of a draft bill would not present any great problem if it is decided to go on with it when the House opens on Jan. 25.

## More Employment

Gain Shown In All Provinces Except Prairie

Ottawa, Ont.—Four of the five Canadian economic areas registered heightened activity at the beginning of December, according to data of the employment situation issued by the Dominion Bureau of Statistics. Upward was registered for the Maritime, Quebec, Ontario and British Columbia. The prairie provinces showed a decline.

In Ontario, 3,741 firms making returns showed 362,860 employees on December 1 compared with 345,940 at the beginning of November.

In British Columbia, 811 firms reporting showed 70,036 employees on December 1 as against 68,777 on November 1.

In the prairie provinces, 1,234 reporting employers had let out 6,627 workers, reducing their staffs to 111,714 on December 1, the Bureau states.

Continued increases were registered in Toronto, Hamilton, Windsor and in Winnipeg, but there were small declines in Montreal, Quebec and Vancouver.

### Would Pay War Debts

Paris, France.—The new habit of former premier Edouard Herriot in favor of payment by France of its war debts to the "United States fell like a pebble in the ocean," a government spokesman said. M. Herriot said he recognized "my opinion is unpopular" and that the statement passed unnoticed.

### Is Proposed

Ottawa, Ont.—John C. Shipman, has been appointed director and superintendent of printing at the government printing bureau, Ottawa. He succeeds P. M. Draper, who recently retired. Mr. Shipman has been employed in the government printing bureau since 1928.

## KING GEORGE SCORES WITH HIS UNIQUE CATTLE

His Majesty the King carried off the first prize for Highland Heifers at the famous Smithfield Cattle Show when the fine beast shown above received the judges' award. This unusual type of heifer, familiar in the Highlands of Scotland, is one of the most picturesque cattle in the world. In their native haunts they are the delight of artists because of their color, shaggy coats and long horns.

### Many Things to Be Thankful For.

To its many friends The Sun extends the heartiest of good wishes for a Happy and Prosperous New Year. The times are far from being as bright as we would desire, as a noted writer remarks, yet there seem to be many reasons at the moment for which we can be most thankful. At this time last year this whole Continent was plunged into the very depths of the world depression. The outlook never seemed gloomier, yet substantial advances have been made since that date, and the predictions some were bold enough to make a year ago that better times were in sight, and that the price of wheat would no doubt rise, have been borne out by events. The Dominion Bureau of Statis-

tics tells us that economic conditions as a whole in Canada have improved nearly 19 p.c. during the past year, and that some 200,000 people in Canada have gone back to work. In the U.S. even greater improvements have occurred in employment, in industry, in agriculture, and in the return of public confidence.

The price of wheat at primary markets is approximately 50 p.c. higher today than it was a year ago. This means that at the country elevator at the average point in western Canada the price of wheat is almost double than in 1932.

The burdensome "carryover" of wheat in the world that has been depressing price has been reduced by at least 25 p.c.—some estimate by as much as 40 per cent. All in all, then, it would seem that there are tangible evidences that the crisis of the depression is past, and that recovery is beginning to take place the world over.

As a progressive dairyman desiring to secure maximum profits from my milk herd, I realize the necessity of adhering to an organized schedule of care, feeding and handling.

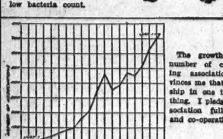

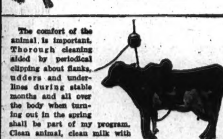

Public Inquiry: I have better than purified milk and more and better milk from each cow.

My first step should be the selection of a true type herd—a selection which should always command great care and good judgment.

Proper selection of dams also will bring its own rewards in more milk, better milk and better animals.

The growth in the number of one of my best cows convinces me that membership in one is a good thing. I pledge my association full support and co-operation.

Proper feeding is essential. Therefore I shall always provide a carefully balanced ration to my herd as well as a plentiful supply of pure, clean water.

Any cow in my herd is bound to be a leader or otherwise leading in necessary qualifications shall undergo a fair test. What I depend on my herd must come back to me as a profit.

During the hot months, whenever possible, I shall supply my herd with a cool, clean, outside resting place, where they may chew their cud. By peace and ruminate on the benefits of being a provider rather than a parasite.

A dry condition the that pictured here shall never prevail in my herd. Rather than permit, carry and break and, I shall strip and quickly and thoroughly by wiping with a damp cloth.

The dairy is necessary that have my milk must have quality and sanitation as much as I do. They must carry on from the best known which I have no control.

Then when my milk is better I shall know I am ready for my office. I shall get more milk and more money for my milk and the result of clean and better milk shall spread throughout the land.

## Occasional Wife

EDNA ROSS WEBSTER  
Author of  
"THE HOUSE OF  
LIFE" and  
"THE HOUSE OF  
DEATH"

## SYNOPSIS

Camilla Hoyt, young and beautiful art student, and Peter Anson, a struggling sculptor, fall in love and marry secretly, deciding to live apart until the time comes when she can support herself. Camilla, the adopted daughter of wealthy parents, is not to inherit money which she comes of age. She is preparing herself for life with a course in commercial art, hoping to get a job to enable her to support herself, and has been making the rounds of the agencies. Peter, working in his studio on an idea for a figure with which he hopes to win a scholarship to study abroad, receives a call from a beautiful model, Sylvia Todd, who offers to work for him, and he goes to her home for the first time. He cannot afford a model, but promises to think it over. Peter discusses the matter of a model with Camilla and decides to employ Miss Todd. Together Camilla and Peter decide on the figure, and Camilla, at her family's summer home, is a bit disconsolate without him. Mrs. Werts, one of Camilla's friends, who is in love with Peter himself, suggests that she and Camilla and Peter Wayne drive into town to get a party. Working with Miss Todd, Peter discovers she is also employed by Gus Matson, his former roommate, who once tried to take Camilla from him and with whom Peter and Camilla quarrelled. Camilla and Avis arrive to take Peter to his studio, but he goes, but being without money, slipped away to a nearby pawn shop for a few minutes to pawn his watch. The watch panned, Peter told the others and they all attend a gay party at a fashionable club. Peter is a bit panicky over the bridge at ten cents a point is suggested.

(Now Go On With The Story)

## CHAPTER XXIV.

But Peter was neither a whiner when he found himself in a tight place nor a quitter when he started a thing. A good sport, now a thing through without resorting to excuses, according to his inflexible creed. He even managed a debonair nonchalance when Avis maneuvered to be his partner. For awhile, the cards were decidedly against him. He felt a queezed breathlessness within him. On the third deal, he doubted his opponent's bid and scored for the first time; and on the last deal he had a hundred aces, bid no trump and made it by a close margin. His total loss to his opponents was only two dollars and seventy cents, but it might well have been ten times that amount against him. Pure luck, that was all.

For that matter, he would have preferred an even break, but he paid his loss with a gay indifference. The evening was young, yet. Plenty of time for emergency repairs. Camilla met his eyes anxiously, and he knew that she had been as much concerned over the outcome of the game as he was. Of course, she did not know that his watch was in pawn, but she well knew that his balance was always precariously near the

jumping-off place, and surmised how serious a loss might be to him.

Camilla was just urging another game when Bates rescued the hour for Peter by announcing that dinner was served. His impulsive countenance, which he would have maintained for no one except Camilla, noted the soaring record of the mercury, his resentment at this sudden addition to his duties and his disappointment of youth in general.

He had been a fixture of the Hoyt household when Camilla had joined ten years ago, and new servants might come and old ones go, susceptible to Camilla's winsome manners and tolerant for wages sake, but Bates remained immovably loyal. He alone, of the present menage, knew that Camilla was not a daughter of the Hoyts, which secret he never disclosed as some servants would have delighted in doing, but it vindicated his fatherly interest in every thing which concerned her.

Was she not one of his own—a stranger in a far country where pretense and hostilities buffeted on all sides? True, Camilla had been at what appeared to be a fortunate anchorage, but that was discounted when it meant constant submission to a benefactor like Mrs. Hoyt. He realized this from the first, long before Camilla was old enough to analyze the advantages, pro and con, of her situation.

The bond of friendship between this bland automaton who was Bates in disguise and the pitiful little orphan who had two sets of parents and yet no paternal sympathy, had developed when the bewildered child in her strange new environment had sought some explanation of her new mother's disciplinary measures and had discriminated between the two conflicting elements of life, interpreted the one for her in the language of the other, so that it had been Bates' human affection and presence as much as anything, which had been responsible for Camilla's satisfactory development from the chrysalis into the butterfly. More to his with it, in fact than Mrs. Hoyt's dutiful mastery of psychology and psychiatry.

Bates also was one of those few who knew about Camilla's imminent rejection into that world from which she had been captured; like a wild bird caged in a gilded cage until it had forgotten all the innate cunning of life sustenance and preservation, then released again to conquer a hostile world of which it knew nothing, and to soar in the clouds with cage-weakened wings.

His first rebellion had been replaced by a secret hope and exultation, fostered by Camilla's staunch effort to meet the situation. After all, it might prove to be the best thing for Camilla, to return to her own element. He knew that she only tolerated these guests who pressed to be her friends, and it was for her sake that he performed his duties unctuously.

Preceding the dinner, he moved suavely about the veranda with trays of tomato juice cocktails and canapés that were like minute formal gardens in their colorful designs. The chef had devoted hours to their dainty perfection and these irresponsible boys and girls consumed the delectable morsels at one mouthful or nibbled them with elaborate lack of appreciation.

Bates' eye had favored Peter, since that first night when the latter had humorously ridiculed his rigid attitude to formality. One thing he did not know, was Peter's new relation to Camilla, for which his proteges felt some compunction. But he knew that the only way to keep a secret was to confide in no one. There was no sharing that particular secret with anyone except Peter. However, if the time should arrive when she needed a champion, she might count on Bates, Camilla knew.

Hilarity increased with the further progress of the meal in the dining room which also was half exposed to a sweeping view of the lake, lighted now with translucent moonlight that trailed a silver path across the black water, like a bridal veil trailing down a carpeted aisle. But these revelers who followed a mad pace in their search for youth's pas-

**BABY**  
Is happy when he's healthy. Scott's Emulsion of Cod Liver Oil promotes health and prevents rickets.

**SCOTT'S EMULSION**  
RICH IN VITAMINS

sion, ignored the romance of the night and staked their appetites with pungent chine, lawless consumption of liquor, imported delicacies and risqué conversation.

Avis and Terry set the pace and challenged the others to follow. Competition was keen, and their asinine wit sparked like a lighted ember tossed from one to another. There were only two who never reached out to grasp the fiery brand and fling it back again. Camilla was bored and disgusted; Peter was shocked, though he was a man for a that. He smiled with effort at their bold quips and repited to their direct sallies with stultifying propriety.

Of course, his place was beside Avis. Mrs. Hoyt had arranged for that and Avis contributed her best to the arrangement.

"Did you hear that Bruce Walton had gone crazy over that Townsend girl who is a guest at the Mallory's?" inquired Cathie. "He thinks she is beautiful. Now, I ask you—what can Bruce see about her?" This new interference had played havoc with Cathie's summer flirtation, as everyone knew.

"Oh, he saw her getting into a car," Terry shrugged.

Appreciation was duly expressed. "She must be years older than Bruce," Cathie continued, "and Bruce is no adolescent. How old would you say she is, Avis?"

"Plenty. And what makes it worse, a woman is only as young as she looks, while a man is young as long as he looks. Bruce has two eyes and uses them."

Hilarity mounted to a crescendo which subsided only to mount again with Terry's inquiry, "Well, I haven't seen the new pansy, Avis. Asksing you boys, has she got bedroom eyes?"

"Can make, no, boss!" Dan Mason mimicked, "she's down eye'd in't room eyes, just plain ordinary dinky room eyes."

Under the din of laughter which ensued, Avis murmured to Peter, "Shall we walk up the beach after dinner? I want to talk to you about your work, Peter. I want so much to help you. I'm bored to tears with all this to do, and you're just about the only interesting man I know."

Avis was trolling her line for a sucker, Peter surmised. She thought he was one who would swallow the bait, hook, line and sinker. He closed his mouth with a snap, figuratively speaking, and swam aside warily. If he stayed inside, it would probably involve a loss at cards, but he preferred even that, with some appalling LOU's, to meet later, to an hour alone with Avis Werth on the beach.

He risked an alternative. "Sorry, I've promised Miss Hoyt to do some impersonations to help entertain the crowd. I think that is the real reason she came into town for me."

"Oh—" her involuntary reaction of impatience was changed with sudden tact to one of surprised admiration. "Why? I didn't know you were an impersonator! Is there anything you can't do?" she questioned. "I'm trying to see you perform."

**WHEN YOU FEEL GROGGY**  
take a bracing, sparkling glass of  
**ANDREWS LIVER SALT**  
TO PICK YOU UP

"Well, I'm not so good that it would be worth all that effort. Like all amateur stuff." He thought with some amusement. "Neither does Camilla know I am an impersonator. We have been much too busy for her to discover that. But she has to know, it now, and use me. I've committed myself to the proposition."

Camilla was less surprised than Avis to discover an entertainer in her party, but she was grateful for the diversion.

"I've let myself in for it, dear, to escape that immortal who waits to lure me out on the moonlit beach," he confided. "I told her I came out to put on a vaudeville act for the crowd. Want me to try? I know a few stunts."

"That would be wonderful," Camilla agreed. "I was just wondering what to do with them."

So, with a few improvised articles to supplement his imitative features and gestures, Peter became shuffling, artless Amos and patient, erudite Andy; delineated George Arliss, facetious Will Rogers, guileless Grace Allen, voluble Walter Winchell. His efforts were strenuously applauded and audibly complimented. His audience was the kind that does everything vigorously, so long as it has nothing to do with work.

(To Be Continued.)

## Not Looking For Sympathy

English Doctor Says Fat Men Glory In Their Curves

Somebody once said, "Nobody Loves a Fat Man," and the phrase has stuck, but a greater man named William Shakespear, boasted the fat man and disliked the Cassius type with a "lean and hungry look." Doctors tell us it is a crime against physical fitness and long life to carry more than about ten per cent. excess weight. However, it is pleasing to find an English doctor, one Christopher Howard, who is himself fat putting in a jocular plea for the fat man in such a staid professional journal as the Lancet.

"We glory in our fat," he writes, "our laughter, good temper, sociability, our appreciation of food and drink, and courage. We would rather die in full possession of our faculties in our middle age than totter about in scrawny-legged misery for a few extra years, lean and lovely lepers, suspicious and suspected."

Admitting that he is not even a small fat man, Dr. Howard protests against "pseudo scientific pontifical pronouncements," and declares, "We will not be pitied—for we glory in our curves. We are the salt of the earth, so let us damn the diet-writer and stick to our savory. Attenuated beings who gorge to the full and yet continue to look aemic (nervous) have the impertinence to accuse us of greed because we eat when we are hungry."

Laughter, good temper and sociability—these are common virtues in a fat man—and of these the world needs a great deal more.

The world would be a miserable place without our jolly fat man.—St. Thomas Times-Journal.

## Immigration Falls Off

Divides Into A Mere Trickle For First Ten Months Of 1933

Immigration into Canada which swelled into a mighty flood a few years ago dwindled to a mere trickle in the first 10 months of 1933. According to figures released by the Department of Immigration, 12,505 men, women and children, representing 41 races, entered Canada between January and October. This was a decrease of 32 per cent. from 1932 totals. Immigration into Canada reached a peak of 402,492 in 1913.

In the 10-month period, 7,549 Americans entered Canada, 2,024 British subjects and 571 northern Europeans.

**Japan Plans Trade Reprials**  
The Government, expressing fear that Japanese products are to be excluded from European and British Empire markets, is preparing to ask the Diet for power to make tariff reprisals by executive decree. A Foreign Office spokesman said Tokio is sending a note to governments from Europe indicating plans to ban Japanese manufactures, some of the reports hinting at concerted action to this purpose by several powers.

## Little Helps For This Week

"Blessed is that man that maketh the Lord his trust."—Psalm 49.4.  
"That we may lead a quiet and peaceable life."—1 Timothy 2:2.

Just to let thy Father do  
What He will:  
And to know that He is true,  
And be still;  
Just to trust Him, that is all:  
Then the day will surely be  
Peaceful, whatever befall.  
Bright and blessed, kind and free.  
—F. R. Havergal.

Every morning compose your soul for the tranquility and all through it be careful to recall your resolution, and bring yourself back to it. If something discomposes you do not be upset or troubled, but having discovered the fact humble yourself before God and try to bring your mind into a quiet attitude. Say to yourself "Well, I have made a false step and must go more carefully and watchfully." Do this each time however frequently you fall. When you are at peace use it profitably, making constant acts of meekness, and seeking to be calm even in the most trifling things. Above all do not be discouraged but be patient, wait and strive to attain a calm gentle spirit. —Frances De Sales.

## Movies For African Natives

Show For Education In Farming Methods: Had Unexpected

An amusing picture of the effect of movies in East Africa is painted in a dispatch from Dar-Es-Salaam. An agricultural show instituted to educate the natives in the improvement of farming methods had an unexpected result. "With the doors closed and the windows curtained, the first appearance of a picture on the screen was greeted with cries from the spectators. The doors were opened and the whole audience rushed out into the daylight and safety."

Although the Government attaches considerable importance to this innovation in East African life, how is one to explain to natives that certain wheels go round and that light has certain effects and make these explanations prevail against all sorts of baggages of native suspicions and superstitions?—New York Evening Post.

## Yes And No

A man walking along a street was accosted by a stranger.

"Excuse me," said the stranger, "do you know where the postoffice is?"

"Yes," replied the man and walked on.

After a few paces, it occurred to him that he had been a little rude not to have told his inquirer where the postoffice was, so running back to him, he said, "Do you want to know where the postoffice is?"

"No," replied the stranger, and he walked on.

CHANTLER & CHANTLER, LIMITED  
Canadian Distributors,  
49 Wellington St. W.,  
TORONTO, ONT.

W. N. O. 2027

### United Church News.

At the first evening service at the United Church last Sunday, the 31st, the pastor, Rev W E Sieber, gave a very interesting dissertation on the principal world events of the past year. He dealt, firstly, with the U.S., and gave a resume of the events under President Roosevelt's regime which showed much time and study had been devoted to its preparation. The speaker then dealt with Germany, and Hitler and the latter's followers; later dealing with France and Britain.

A goodly number met at 11:30 and ushered in the new year with songs and prayer.

On Wednesday the 3d the Ladies Aid met at the home of Mrs Malloch.

### Put a Radio in Your Car.

There will be no extra permit required for this, providing you have a licensed receiving set in your domicile. This does not mean that automobile sets will be entirely free from the license restrictions. The concession now granted by the radio branch of the Marine Dept. will apply only to automobile sets owned by a party already holding a license for a set in his home.

### New Mail Schedule.

From the East and to West—Sun, Tues. and Thurs. at 10:37 p.m.  
From the West and to East—Sun, Wed. and Fri. at 8:01 p.m.  
Mail for despatch to East should be posted before 7 p.m. and for West before 10 p.m.

### Stony Plain and District

Among the visitors to Stony over the holidays were: Mr and Mrs Reuben Larson, Edmonton; Mr and Mrs C Chesner, Mount Robson.

Miss Jean Callahan is spending the holidays at her home, here.

The local schools re-opened yesterday, Wednesday. A van load of pupils came to town on Tuesday, but found their classes did not resume until the next day.

Rev E Berthardt held services in Stony Plain last Sunday morning. The Catechism classes will resume on Monday next Jan. 8, with sessions every day.

Mr H B Bjork, proprietor of the Sanitary meat market, is offering a splendid tea set, which will be presented to the party with the highest record for cash purchases. The contest closes in three months.

Services will be held at St. Philip's church by Rev Chas. Keenan at 9:30 a.m. Saturday next, Jan. 6th, Epiphany Day.

BUTTER AND EGGS WANTED at The Royal Cafe.

### The Welcome "Break"

The break in the 25-day below-zero weather which occurred early on Tuesday, was hailed with delight by everybody, particularly those whose business kept them at outdoor work. Meteorological experts say the long spell was a record for the time of year, and predict numerous similar cold spells for the balance of the winter.

### The "Till Sunrise" Dance.

A happy, car-free throng filled Moose hall Monday, at the opening of the Sunrise dance. Mr Kelly remarked it was the largest he had seen in his hall, at a dance. The patrons enjoyed the music given by the Hawaiians, and some did stay, to have breakfast at Larson's.

The next of these popular affairs will be held on Friday, Jan. 12, at the same place, with another bunch of Edmonton musicians providing the music.

### U.F.A. DANCE,

Lucknow Schoolhouse, Friday, January 5th.

### Holborn Happenings.

Holborn Juniors elected Knox McKinnon as Pres. at the annual meeting; H Partridge as V-Pres; O Davidson sec-treas. The meeting was attended by a good crowd. The Mock Parliament will open Sat. Jan 27.

The cold weather has piled up order at Everington's coal mine as fast the Proprietor can hardly keep up to the demand.

Sidney Wright and "Buster" McDonald intend to start shortly for the Breton district. Buildings will be erected by McDonald.

Last week three of Holborn's brave fellows started for Homestead land, near Breton. The 2d night they got lost and spent the night in the timber at 30 below. On finding their cabin the Chief prepared "cats" and a feast was made of partridge, frozen squid, nearly black coffee, and gluey straboot minus the accessories. On their return home they now relate the tale of the Great Adventure.

### Brightbank News

Altho the weather was very cold, everybody speaks of having had a very good holiday.

The long, cold spell has made people appreciate the double box on the sleigh, a good team, and lots of covering to duck under.

Mr D Lent, Duffield, and Mr A McDonald, very near met with a serious accident while coming down the steep and sharp curves at White Whale Creek bridge, when meeting with another driving party who, owing to the cold, were well under cover. This piece of road is in need of straightening out, or of widening the grade.

Due to the long, cold spell of weather, work on Hausen's Corner Hall has been postponed until a more favorable time.

The Christmas concert at Lucknow school, put on by our worthy teachers, Miss Krull and Miss Strickland, was a huge success, the building being very crowded.

Fashions change, and so do fancies. In this part blondes do not seem to be favorites any longer; as the straight-haired brunets appear to be the choice at present.

The party who came all the way from Burtonville, to help with the amusement and entertainment after the concert at Lucknow school, did his part well. Come again, Earl!

### Rosenthal News.

Mr Lincoln Steffler, Heathdown, spent Christmas holidays at the home of Mr and Mrs P Baron; while David White, also from Heathdown, spent his holidays at the home of Mr and Mrs J J Kulak.

First, chicken thieves; now turkey thieves! Some party, at present unknown, stole the prize turkey gobbler from the shed of Mr Julius Kulak on Christmas night. The thief, as shown by tracks found, entered the yard on horseback, and after sucking the 30-lb "watchdog" left the same way.

North and south roads are again heavily blocked with snowdrifts. Car roads will probably be closed for the balance of the winter.

Rosenthal school re opened Tuesday, the 2d.

### The Sun's Calendar.

JANUARY—  
5—Dance, Lucknow Schoolhouse.  
6—G. M. Hockey Broadcast; to be heard at Royal Cafe.  
12—Whist Drive and Dance, at Moose Hall.  
13—Glory Hills Ratepayers meet.  
27—Mortgage sale of land, at the Postoffice.

### On the Side.

Here's a readymade alibi for non-churchgoers: A man in an Eastern city, hurrying to get to church on time a few Sunday evenings ago, tripped and suffered a fracture of the ankle.

To meet the condition of the times one of the latest ideas in ways and means for churches is reported from the State of Illinois, where a rural congregation has presented its pastor with a shotgun. There was no ulterior motive in the presentation, its purpose being merely to enable the pastor to cut down the cost of living by hunting his own game, thus making up some of the shortage on his salary that the congregation had not been able to pay.

Hockey fans all over Canada will be pleased to learn that Irvin Bailey, of Toronto Maple Leafs, injured in a crash with Eddie Shore, is out of danger. No 1 col players have been injured in the 1933-34 season, as yet.

### Heard at the Dance.

Louise—When I dance with you I feel as tho I were treading on the clouds.

Gretchen—Don't be mistaken, Lou; thm's my feet.

### MORTGAGE SALE —OF— FARM PROPERTY.

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act," under a certain mortgage which will be produced at the time of the sale,

There will be offered for sale by public auction at the Post Office in the Town of Stony Plain, in the Province of Alberta, on

**SATURDAY, the 27th  
DAY OF JANUARY, 1934,**

at the hour of 2:30 o'clock in the afternoon, the following property, namely:

The most southerly 15 chains in width throughout of the South East Quarter of Section 24, Township 62, Range 1, west of the 5th Meridian, containing 60 acres, more or less. And Legal Subdivision 16 of the North East Quarter of Section 13, in said Township and Range, containing 40 acres, more or less. Excepting out of the South East Quarter of said Section Twenty-four all Mines and Minerals.

Terms of sale to be 10 per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of the sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances, save taxes for the current year.

The vendor is informed that the above property is situated about 11 miles from the Town of Stony Plain, where there is Post Office, Church and Market. The improvements consist of a 2 story log house, log stable, log hog barn and log implement shed. There are about 80 acres under cultivation and 15 to 20 acres of brush. The water supply is a good well.

For further particulars and conditions of sale, apply to STEPHEN, JACKSON, GAUNT & MATHEWSON, 411 Kuiper Block, Edmonton, Alberta.

DATED at Edmonton, in the Province of Alberta, this 23rd day of November, A. D. 1933.

STEVEN, JACKSON, GAUNT & MATHEWSON,  
Vendor's Solicitors.  
Approved  
"A. T. KENNARD"  
Deputy Registrar.

## ALBERTA'S OPPORTUNITY

in the

## British Bacon Market

For the first time in history the World's Greatest Bacon Market has granted a definite quota to Canadian Bacon Producers, under controlled imports to Assure a Steady Market. Canada's quota is 200,000,000 pounds annually.

### The Key to This Market Is Quality

Alberta was second in 1933 among all provinces in total hog marketings, but only eight hogs in every 100 marketed were suitable for the British trade.

### Not More Hogs, but Better Hogs

What is needed is not greater numbers, but a greater proportion of the Select Bacon Type required by the British Market.

Policies to Encourage Production of High Quality Bacon Hogs Suitable for Overseas, have been adopted by the Alberta Department of Agriculture in co-operation with the Federal Government, Railways and Packers. These include best housing and exchange of off-type sows by the farmers for selected gilts from the packing plants.
